What is this product?

Type

This is an investment fund established as a Fonds commun de placement (FCP).

Objectives

Investment objective The Sub-Fund aims to achieve positive long-term returns, mainly from capital appreciation. The Sub-Fund does not follow specific geographical constraints or predetermined investment allocation weighting models. The frequency and rate of changes in portfolio composition depends on the prevailing conditions in the markets the Sub-Fund invests in and on the management company's view on expected future developments on those markets. The Sub-Fund's portfolio provides exposure to a broad spectrum of asset classes, including but not limited to equities, fixed income, commodities and real-estate, cash.

Investment policies The Sub-Fund's investment policy is achieved via a diversified portfolio consisting of UCITS or other collective investment schemes eligible under article 41 (1) of the 2010 Law, and/or directly in Transferable securities, equities, bonds and ETC (including ETFs) that will comply with the ratios of diversification, Derivatives and Cash.

Holdings in any of the above mentioned asset classes may be between 0% and 100% of net assets.

The UCITS to be included in the Sub-Fund's assets are chosen by evaluating both the underlying assets of the specific UCITS and its portfolio, its size, its liquidity, its statistical evaluation and its interaction with other Sub-Fund's assets.

Transaction costs on portfolio assets of the Sub-Fund affect its performance.

Benchmark The Sub-Fund is actively managed. The Sub-Fund is not managed in reference to a benchmark.

Redemption and Dealing Subscriptions and redemptions are daily. Redemption orders received by the Registrar Agent on any Dealing Day are executed on the next business day.

Distribution Policy Income generated by the Share Class is reinvested.

Launch date The Sub-Fund was launched on 15/01/2010. The share class was launched on 30/10/2017.

Fund Currency The base currency of the sub-fund is the EUR.

Switching between Sub-Funds of NBG International Funds FCP Switching between share classes of NBG International Funds FCP is not permitted. Switching between sub-funds is permitted provided the shareholder meets the requirements of the destination share class. For full details please refer to the Prospectus.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the Sub-Fund to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at <http://www.nbgam.lu>.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 March 2015 and 31 March 2020.

Moderate: this type of scenario occurred for an investment between 31 January 2015 and 31 January 2020.

Favourable: this type of scenario occurred for an investment between 31 August 2013 and 31 August 2018.

Recommended holding period		5 years	
Example Investment		10,000 EUR	
Scenarios		if you exit after 1 year	if you exit after 5 years (recommended holding period)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs Average return each year	5,067 EUR -49.3%	5,514 EUR -11.2%
Unfavourable	What you might get back after costs Average return each year	8,201 EUR -18.0%	8,374 EUR -3.5%

What happens if the Sub-Fund is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should we default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	647 EUR	1,686 EUR
Annual cost impact*	6.5%	3.3%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.2% before costs and -1.1% after costs.
