What is this product?

Type

This is an investment fund established as a Fonds commun de placement (FCP).

Objectives

Investment objective The objective of the Sub-Fund aims to provide attractive yield over a ten period by investing in EUR denominated debt instruments.

The Sub-Fund is designed to be terminated approximately 10 years after the completion of its asset accumulation period on 31/03/2034 (the "Maturity"). The Sub-Fund is designed to be held to maturity and Investors should be prepared to remain invested until the Sub-Fund is liquidated. The Sub-Fund's investment policy is designed to provide exposure to mainly bonds, treasury bills, notes or other similar fixed-income or floating rate securities issued primarily by European government, supranational or corporate issuers. At least 50% of the Sub-Fund's Portfolio should hold an Investment Grade Rating by at least one of the three major ratings agencies.

Investment policies The Investment Manager will invest in securities of maturity of 8 to 10.5 years, with an average maturity of approximately 10 years at inception and will construct the Sub-Fund's portfolio based on the attractiveness of the specific fixed income instruments during the Initial Offering Period. The Portfolio Manager will adopt a buy-and-hold strategy, but in special circumstances, the Management Company may exceed the 10 year maturity threshold if necessary for reinvestment purposes or to avoid losses in periods of high volatility.

When, in the opinion of the Investment Manager, the credit rating of an instrument or the credit profile of an issuer deteriorates after initial purchase, the Investment Manager will, at its full discretion, decide whether to hold or sell such instrument after considering various factors, including but not limited to risk of default, time to maturity, liquidity and market price, and re-invest the sale proceeds in other fixed income instruments within the scope of the investment strategy.

Proceeds received from instruments maturing before the maturity date shall be reinvested or held in cash or cash equivalents, at the Investment Manager's discretion.

The Sub-Fund can have up to 20% of its net assets in ancillary liquid assets (i.e. cash deposits at sight). Under exceptionally unfavorable market conditions and if justified in the interest of the investors, the Sub-Fund may temporarily invest up to 100% of its net assets in ancillary liquid assets and other liquid instruments. In addition and subject to any limitations set out in the "Techniques and Instruments relating to Transferable Securities" as more fully described in the Prospectus, the Sub-Fund may use the following techniques and instruments such as financial futures, warrants, options and Interest Rate Swaps to achieve its investment objectives and for the purpose of efficient portfolio management.

The investments of the Sub-Fund do not take into account the EU criteria for environmentally sustainable economic activities in the meaning of the EU Taxonomy Regulation.

Benchmark The Sub-Fund is actively managed. The Sub-Fund is not managed in reference to a benchmark.

Redemption and Dealing Subscriptions and redemptions are daily. Redemption orders received by the Registrar Agent on any Dealing Day are executed on the next business day.

Distribution Policy Income generated by the Share Class is reinvested.

Launch date The Sub-Fund and the share class were launched on 05/02/2024.

Fund Currency The base currency of the sub-fund is the EUR.

Switching between Sub-Funds of NBG International Funds FCP Switching between share classes of NBG International Funds FCP is not permitted. Switching between sub-funds is permitted provided the shareholder meets the requirements of the destination share class. For full details please refer to the Prospectus.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 15 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 December 2020 and 28 April 2023.

Moderate: this type of scenario occurred for an investment between 29 November 2009 and 29 November 2019.

Favourable: this type of scenario occurred for an investment between 29 June 2008 and 29 June 2018.

Recommended holding period		10 years		
Example Investment		10,000 EUR		
Scenarios		if you exit after 1 year	if you exit after 5 years	if you exit after 10 years (recommended holding period)

What happens if the Sub-Fund is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should we default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,

■ 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years	if you exit after 10 years (recommended holding period)
Total Costs	50 EUR	313 EUR	816 EUR
Annual cost impact*	0.5%	0.5%	0.5%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.3% before costs and 4.8% after costs.
